100 Internet security tips that John would never follow

Internet Security

Everyday Internet Security Tips

Author M Mubashar
41 Amazing Internet Security Blogs You Should Be Reading

Author: M Mubashar

1. Krebs on Security
Brian Krebs is the man behind Krebs on Security. Being hacked himself in 2001, he takes a personal interest in online security and is one of the well-known names in today’s security landscape. He covers topics from latest threats, privacy breaches and cyber-criminals to major security news.

2. Schneier on Security
Bruce Schneider is probably the most well-known name that you can recognize in our list, and was even called a “security guru” by The Economist. He wrote books, hundreds of articles, essays and security papers on security matters. At the same time, he is a known figure in the media environment which recognize him as an important voice for the online security, not only for his knowledge on the matter, but also because he knows how to express his opinions.

3. TaoSecurity
This security blog is run by Richard Bejtlich, Chief Security Officer at Mandiant and author of many books on security. With an extensive background on cyber-criminal world and malicious attacks on enterprise networks, he shares his experience on digital defense, network monitoring and detection on his security blog. Since a great number of network attacks come from China, he is specialized on Chinese online criminals.

4. US-CERT
This is the official website of the Department of Homeland Security, from USA.
Though it is not a classical security blog, its purpose is to improve Internet security by providing specialized and well detailed information on cyber-criminal activities, malware, phishing attempts and online threats. To use their own words: “US-CERT strives for a safer, stronger Internet for all Americans by responding to major incidents, analyzing threats, and exchanging critical cyber-security information with trusted partners around the world.”

5. Dark Reading
Dark Reading is a widely-read cyber security site that addresses professionals from the IT environment, security researchers and technology specialists. They use their experience and knowledge to provide articles, recommendations, news and information on IT security.

6. CIO
CIO is the place where you find news, information technology articles, insight and analysis on major data breaches and online threats. Covering multiple aspects of worldwide web, it provides in-depth, content rich information for IT professionals and normal users.

7. **Network Security Blog**

Martin McKeay is the voice of this security blog, where you can find information and news on privacy and security issues. As Martin says: “I took up blogging as a means to extend my knowledge and test my ideas about security…”.

8. **Security Watch with Neil Rubenking**

Known for his direct and witty style, Neil Rubenking is the man you have to listen if you search for technical advice on the main security solutions, from firewalls, antivirus and antispam products to full security suites. Detailed reports and sharp analysis of security programs place him be on your follow list if you look for this type of information.

9. **Paul’s Security Weekly**

Paul’s Security Weekly, founded by Paul Asadoorian, brings you security news, useful technical articles, research studies and valuable information on hacking and cyber-crime through various channels, from blog posts, videos to podcasts.

10. **PCMag.com**

One of the most popular sites in the software industry, PC Magazine comes with reviews and studies on the latest products for online security. For an objective analysis of a product you may be looking, don’t forget to look for the dedicated article on this website.

11. **Wired**

One of the classical North American publications reporting on technology and its role in culture, economy and politics, Wired approaches topics on online privacy, cybercriminal threats, systems security and the latest alerts.

12. **Forbe’s Firewall**

Forbe’s Firewall comes from one of the leading media company in the online environment and provides strong analysis, reliable tools and real-time reports for cyber-security news and information on the latest online threats.

13. **TechRepublic**

TechRepublic provides large resources for the online industry, such as blog articles, forums, technical papers and security data. All the valuable information available helps IT professionals and technology leaders to come with the best decisions on their business processes.

14. **Zero Day**

The Zero Day security blog is important for all the people which are part of the IT
industry and you should follow it to stay up-to-date with the latest security analysis, software vulnerabilities, malware attacks and network threats.

15. Securosis

Securosis is a security research and advisory company that offers security services for companies and organizations. At the same time, you can find on their security blog some useful articles and insight on managing and protecting online data.

16. The Guardian Information Security Hub

Known for its quality articles on world news, Guardian offers a section dedicated to information security for companies and individuals. To stay up-to-date with the latest articles and news on cyber security, make sure you follow this site.

17. Help Net Security

This security site is a popular place for data and security news and you can find here the latest information and articles related to the IT industry.

18. Techworld Security

The section dedicated to security on this site analyzes the latest malware threats and zero-day exploits. You can find here other important topics and subjects, such as security articles, how-to documents and software reviews.

19. Fox IT Security Blog

This security blog is a very good source of information on online security, technology news and cyber crime defense.

20. SC Magazine

SC Magazine comes in the IT environment with technical information and data analysis to fight the present online security threats. Their site provides testing results for e-mail security, mobile devices, cloud and web security.

21. Network Computing

The content of this security blog focuses on cloud technology and enterprise infrastructure systems. Its published articles cover security solutions on how to deliver applications and services for an increasingly large threat environment in the business world, news and expert advice.

22. Infosecurity Magazine

Infosecurity Magazine is an online magazine which covers not only security articles on popular topics, but is also dedicated to security strategy, valuable insights and technical approaches for the online industry.

23. SANS Institute AppSec Blog

This security site addresses the growing malware threats in the online world by providing training, research, certification and educational resources for IT specialists.
24. Threat Track Security
This security blog keeps you up-to-date with the latest innovations and developments in the IT industry, from security exploits to software vulnerabilities and cybercriminal attempts.

25. CSO Online
CSO focuses on information technology, access management for enterprise servers, loss prevention, cybercriminal threats and software vulnerabilities.

Security blogs from software providers in the IT industry

26. Sophos security blog
Naked Security is Sophos’s award-winning threat news room, giving you news, opinion, advice and research on computer security issues and the latest internet threats. Naked Security is the blog of security company SOPHOS and the place where you can find news, research studies, advices and opinions. Categories range from mobile security threats to operating systems and malware articles. Naked Security is updated multiple times per day and receives around 1.5 million pageviews per month. It has won numerous awards and it is considered one of the best security blogs.

27. Kaspersky Lab’s ThreatPost
ThreatPost is the leading security news website that is part of The Kaspersky Lab. Their articles cover important stories and relevant security news for the online world. They are recognized as an important source of news for online security in important newspapers and publications, such as New York Times, USA Today or The Wall Street Journal.

28. Kaspersky Lab’s Securelist
Securelist is a security blog run by Kaspersky Lab and it addresses a large audience, providing some of the best security subjects on cybercriminal activities and data stealing malware. You can find here security information that focuses on malware, phishing and other threats from the cyber security world.

29. Symantec Weblog
Symantec Weblog is a security blog from one of the biggest providers of security solutions world wide, Symantec. Using their technical knowledge and data collected along the years, they come with strong analysis reports and articles on security threats, online criminals, data stealing malware, system vulnerabilities and many others.

30. Google Online Security Blog
We are surrounded by Google products and services, from their search engine to their web browser, so it is normal to include their security blog in our list. It is a reliable security blog and even more, a reference point on online security and privacy we need to acknowledge.

31. Zone Alarm Cyber Security Blog
The security blog from ZoneAlarm, one of the well-known vendors of security products, provides valuable information on malware defense and online security. Using their experience on malware, this security blog generates malware alerts, practical security tips and the latest news in the IT industry.

32. **F-Secure Safe & Savvy Blog**

A security blog from F-Secure, a company dedicated to online content and privacy protection. On this security blog you will find helpful tips and advises on security issues, from protecting your personal identity to keeping your system safe.

33. **HotforSecurity**

The security blog from BITDEFENDER – one of the leading companies on online security solutions, covers various subjects from the IT world, from Internet scams, online spam and phishing to malware and data stealing software.

34. **McAfee security blog**

McAfee security blog provides the latest tips and techniques from security experts to keep you up-to-date with the latest malware trends in the online environment.

35. **Microsoft Malware Protection Center**

The Microsoft Malware Protection Center analyzes data from all over the world to provide insight and valuable information on fighting online threats in order to protect users from malware attacks and online crime.

36. **SpiderLabs Security Blog**

Investigators and researchers at Trustwave cover the latest technology news on this security blog. Gathering information from research and testing, they publish articles and security studies to fight online hackers and cyber-criminal threats.

37. **Dell SecureWorks**

The security blog from Dell SecureWorks provides the latest news and information for IT professionals and users that need to stay up-to-date with online threats and malware attacks.

38. **Malwarebytes Security Blog**

The Malwarebytes security blog articles cover the latest malware threats and cyber criminal attempts from the online world. You can find their articles on categories, from cyber-crime, exploits, hacking and malware analysis.

39. **Trend Micro Simply Security**

Trend Micro Simply Security site offers expert insights on cloud security, data safety, privacy protection and threat intelligence.

40. **We Live Security**

We Live Security, the Eset blog, is an online resource for cyber security articles and this
blog covers a large network of security topics from emerging online threats to zero-day exploits.

41. CSIS Security Group Blog

The security blog from CSIS Security Group provides valuable information on malware attacks and online threats. Using the internal research data from their own security labs, their studies help users fight cyber-criminal threats.

15 of the best Internet security blogs

In order to keep up to date, I scan daily across an incredible number of Internet or security focussed news sites and blogs. I use Google Reader to aggregate the posts and facilitate easy access to them all in one place. It seems, however, that the articles I dig into are always from the same sites. I’d like to share a handful of those sites with you today. Most you will probably be familiar with, though some may be unknown. I’d highly recommend adding them all to your RSS reader if you have one.

The sites are presented in alphabetical order. I’ve chosen 15 in total.

Darknet – The Darkside

Darknet was launched in 2006 but its origins lie in a network of friends that first formed on EFNet IRC in 1999. With the tagline “Don’t learn to HACK, hack to LEARN”, the site is now a blog that covers Ethical Hacking, Penetration Testing and Computer Security. It features excellent tool reviews, analysis of new vulnerabilities and comment on topics in the press.

Dark Reading

Dark Reading is a “security dashboard for IT professionals who don’t have the time or the luxury of combing wirefeeds, multiple bug feeds, or vendor Websites to find out what’s new or how well it works”. It combines up to the minute news from a variety of sources with excellent analysis from a series of blogs like the excellent Evil Bytes by John Sawyer.

Dancho Danchev

Dancho Danchev’s blog contains in depth technical analysis of the latest technical security trends and malware threats. Danchev is a specialist in open-source intelligence (OSINT), gathering intelligence from the web on the personalities behind current threats. He also specialises in sarcasm. Danchev also contributes to ZDNet’s Zero Day blog with Ryan Naraine from Threatpost (see below).

The Firewall at Forbes

We’ve been following Open Source Intelligence (OSINT) expert Jeffrey Carr through a number of his project. He authored an extremely insightful blog – IntelFusion – before launching the Grey Goose Project, an initiative that investigated instances of state-on-state cyber warfare by fusing all available open source intelligence. Wired covered the launch of the report. Having launched a commercial consultancy off that back of that work, he
has switched his blogging efforts to The Firewall blog at Forbes, where he joins 54 other contributors. The blog is a news service with a strong focus on government, particularly cyber security as a tool of foreign policy.

**F-Secure Weblog**

Mikko H. Hyppönen is the Chief Research Officer at Internet security firm F-Secure. His team of security researchers – personnel responsible for analyzing virus, phishing, spyware, and spam attacks – contribute to the F-Secure Weblog. The topics covered are broad – tools, techniques, botnet analysis, comment – and all the posts are easily accessible for non-technical readers.

**Jeremiah Grossman**

Jeremiah Grossman, a former IT Security Officer at Yahoo!, is the Founder and Chief Technology Officer of specialist website security consultancy WhiteHat Security. Grossman, a technical research and development specialist, is a regular speaker at industry events and is a leading commentator in the mainstream media. His blog articles are based on his cutting-edge technical analysis of web browser and website vulnerabilities.

**Paul Dot Com**

No reading list would be complete without reference to Paul Asadoorian and company over at pauldotcom.com. A weekly podcast rather than a blog, PaulDotCom features the latest news, in depth technical segments and plenty of humour (and beer). He is joined by Larry Pesce, John Strand, Mick Douglas and Carlos Perez.

**Rational Survivability**

A regular keynote speaker and industry commentator, Chris Hoff specialises in “emerging and disruptive innovation and what it means to security”. At the moment that means Cloud Security and Virtualisation. In fact, Hoff is currently Director of Cloud & Virtualization Solutions of the Security Technology Business Unit at Cisco Systems. Rational Survivability is essential reading for any team making use of emerging technologies in the enterprise and who wants to understand the risks associated with them.

His bio is worth a read too.

**SANS Internet Storm Center**

The Internet Storm Center is a SANS project that has been running since 2001 having been formalised following the successful detection, by SANS Incident Handlers, of the Li0n worm. The handlers had isolated the worm and begun analysis within 3 hours of the outbreak, and had released a diagnostic tool and informed the FBI within 14 hours. With this success as its justification, the ISC was created with a remit to spot similar attacks and provide a global warning service. The ISC Diary is populated with the real-time analysis of the volunteer duty “handlers” who monitor feeds coming in from SANS’ DShield worldwide sensor network.

**Schneier on Security**
Bruce Schneier is the author of Applied Cryptography (and 10 other internationally bestselling books), creator of the Blowfish encryption algorithm (which has never been broken), author of the Crypto-gram newsletter (with 150,000 subscribers), a regular contributor to Wired Magazine and, if all that is not enough, is also Chief Security Technology Officer for British Telecom. Schneier describes his interests as an evolving series of generalisations – from mathematical security to computer security, from computer security to general security and now to the psychology of security. Schneier on Security contains essays, comment and links to interesting articles elsewhere on the web. It should be at the top of your list, with no exceptions.

**Securelist**

Securelist (formerly viruslist) is a website managed by anti-virus vendor Kaspersky. It contains articles outlining common threats, in depth analysis of malware, viruses, the underground economy and trends, and a regularly updated blog. Anybody can contribute to the blog, but you have to have over 100 points, gained through submitting comments that are voted for by readers. There is also a refreshingly technical PDF magazine – SecureView – that can be downloaded from the site.

**Securosis**

Securosis is a commercial consultancy specialising in information security research and strategy. Their blog covers a broad range of security topics and features a really useful Friday summary with links to favourite webcasts, podcasts, blog articles, research reports and news articles from the previous week.

**TAO Security**

Richard Bejtlich is the author of ‘The TAO of Network Security Monitoring’, where he lays out a holistic approach to monitoring a network for security. His blog specialises in incident response and network forensics, though he also writes regularly on cyber weapons and cyber warfare.

**Threatpost**

Threatpost is a news service offered by Kaspersky and is managed by Dennis Fisher and Paul Roberts, ably assisted by Ryan Naraine. The Threatpost team scour the web for the latest stories and aggregate them into a single feed of news and expert commentary. The site offers service in English, Spanish and Portugese.

**Zero In A Bit**

Zero In A Bit is the ZeroDay Labs Blog from Veracode, an Internet Risk Management consultancy. It isn’t updated very regularly, but when it is, the articles cover a broad range from legal and compliance issues to mobile malware.

**Top 100+ Cyber Security Blogs & Infosec Resources**

**#1 CIO**

Resources related to information security, including news and opinion and more on
software and application flaws and fixes, data breaches, the inside threat the latest hacker attacks.

#2 TechRepublic – Security

TechRepublic helps IT decision-makers identify technologies and strategies to empower workers and streamline business processes. Their security section dives into the latest threats surrounding cyber security.

#3 US Cert

US-CERT’s mission is to improve the nation’s cybersecurity posture, coordinate cyber information sharing, and proactively manage cyber risks.

#4 Wired’s Threat Level

Privacy, crime, and online security are the topics that carry the headlines here. You’ll find everything from opinionated pieces, to the latest threat alerts.

#5 Zero Day from ZDNet

Staying on top of the latest in software/hardware security research, vulnerabilities, threats and computer attacks. The Zero Day blog on ZDNet is a must for anyone keeping track of the industry.

#6 CERIAS Security Blog

The Center for Education and Research in Information Assurance and Security blog is where Gene Spafford shares his expertise. It’s called the center for multidisciplinary research for a reason.

#7 CSO Online

Areas of focus include information security, physical security, business continuity, identity and access management, loss prevention and more.

#8 Dark Reading

Dark Reading is a comprehensive news and information portal that focuses on IT security, helping information security professionals manage the balance between data protection and user access.

#9 Google Online Security Blog

This is Google’s own security blog, which focuses on all of the latest developments in the security world. Get the latest news and insights from Google on security and safety on the Internet.

#10 Red Tape Chronicles
NBC News Red Tape Chronicles brings you news stories and information on the latest developments in the cyber security space. Find topics that range from privacy to security.

**#11 InformationWeek Security**

You can expect all of the latest news and zero day alerts from this IT security news site. The content is updated daily and is a major news source for everything to do with cyber security.

**#12 Internet Storm Center**

The Internet Storm Center gathers millions of intrusion detection log entries every day, from sensors covering over 500,000 IP addresses in over 50 countries.

**#13 Schneier On Security**

Bruce Schneier is an internationally renowned security technologist, and called a “security guru” by The Economist. He knows his stuff and is a voice in the cyber security industry.

**#14 Securelist Cyber Security Blog**

This is another Kaspersky Lab web property that focuses on malware, phishing, and the cyber security industry. There is no shortage of information and news on what’s happening in the cyber world.

**#15 Symantec Weblog**

The Symantec Weblog uses global research to provide unparalleled analysis of and protection from malware, security risks, vulnerabilities, and spam.

**#16 The Guardian’s Information Security Hub**

The Guardian is a respectful, global media company that highlights issues across many areas. Their Information Security Hub lives up to the coverage they offer in other areas and focuses on security.

**#17 Zone Alarm Cyber Security Blog**

Information on malware and protecting yourself online. From malware alerts to practical online security tips, the Zone Alarm blog will keep you briefed on the latest industry news.

**#18 BH Consulting’s Security Watch Blog**

BH Consulting’s Security Watch Blog was formed to regular, informed with content detailing everything you would want to know about information security and web threats.

**#19 Contagio Malware Dump**

Contagio is a collection of the latest malware samples, threats, observations, and analyses. Get informed, technical education on the newest forms of malware.

**#20 Cyber Crime & Doing Time**

CyberCrime & Doing Time ia a blog about cyber crime and justice related issues. Gary Warner from Malcovery owns this blog and offers up educational and engaging posts on
the latest threats.

#21 David Lacey’s IT Security Blog
David Lacey’s IT Security Blog offers the latest ideas, best practices, and business issues associated with managing security. The blog is hosted on ComputerWeekly.com.

#22 Dell SecureWorks
Dell Securework’s Security & Compliance blog is dedicated to providing up-to-date news and information to help IT professionals and others keep their business secure online.

#23 F-Secure Safe & Savvy Blog
Safe and Savvy blogs about how to protect your online life and the irreplaceable content on your computer. They write about real-life experiences while providing helpful tips on security issues.

#24 Fox IT Security Blog
Information technology is the main topic on the Fox IT security blog. From news to opinions, Fox IT provides excellent content for anyone interested in technology and security.

#25 Fortinet Blog
The Fortinet cyber security blog has something for everyone. There are articles on security research and industry trends, as well as, a healthy section focusing entirely on Security 101.

#26 Help Net Security
Help Net Security has been a prime resource for information security news since 1998. The site always hosts fresh content including articles, new product releases, latest industry news, podcasts and more.

#28 Infosecurity Magazine
What more can you ask for? It’s an online magazine dedicated entirely to the strategy, insight, and techniques that are a daily part of the cyber security industry.

#29 Krebs On Security
Brian Krebs is the face of cyber security journalism. As a former writer for the Washington Post, Krebs is able to take is skills as an investigative journalist to the task and provide the most in-depth coverage of security.

#30 Malwarebytes
Malwarebytes is at the forefront of malware protection, which makes this the perfect blog to stay up-to-date with the latest zero day threats and cyber security news.

#31 McAfee Security Blog
The McAfee security blog talks about research and threat analysis, as well as, provides knowledgeable insight into malware and zero day threats that plague businesses and consumers.

#32 Microsoft Malware Protection Center
The Microsoft Malware Protection Center (MMPC) is committed to helping Microsoft customers keep their computers secure. The MMPC stays agile to combat evolving threats.

#32 Naked Security
Naked Security is Sophos’s award-winning threat news room, giving you news, opinion, advice and research on computer security issues and the latest internet threats.

#33 Network Computing
Network Computing’s content adheres to the valuable “For IT, By IT” methodology, delivering timely strategy & tactics, news, in-depth features, expert reviews, and opinionated blogs.

#34 SANS Institute AppSec Blog
SANS Software Security focuses the deep resources of SANS on the growing threats to the application layer by providing training, certification, research, and community initiatives.

#35 SC Magazine
SC Magazine arms information security professionals with the in-depth, unbiased business and technical information they need to tackle the countless security challenges they face.

#36 Search Security
Search Security provides immediate access to breaking industry news, virus alerts, new hacker threats and attacks, security and certification training resources.

#37 Securing The Human
SANS is the most trusted and by far the largest source for information security training and security certification in the world, which makes their blog a must read for security professionals.

#38 Security Watch
Neil Rubenking heads the charge on PC Mag’s Security Watch. His style is witty and he post frequently, so you’ll always find something worthwhile to read.

#39 Stop Badware Blog
StopBadware is a nonprofit anti-malware organization whose work makes the Web safer through the prevention, mitigation, and remediation of badware websites.

#40 Sucuri Blog
Sucuri knows all about malware and WordPress security. It’s what they do. You’ll find no
shortage of expert advise on how to secure your WordPress site and keep it malware-free.

#41 TaoSecurity
Richard Bejtlich’s blog on digital security, concentrating on global challenges posed by China and other targeted adversaries. Definitely a blog that has been a fixture in the security community.

#42 Techworld Security
The cyber security section on Techworld.com covers news on the latest threats and zero-day exploits. They also offer an abundance of topics ranging from security to how-tos, as well as, technology reviews.

#43 The Honeynet Project
The Honeynet Project members engage the broader security community and educate the public about threats to systems and information.

#44 Threatpost
Threatpost, The Kaspersky Lab security news service, is an independent news site which is a leading source of information about IT and business security for hundreds of thousands of professionals worldwide.

#45 Threat Track Security
Threat Track Security’s IT blog has its thumb on the pulse of the industry. Whether you are in the IT industry or not, if you are interested in security, this blog is for you.

#46 Trend Micro Simply Security
Trend Micro Simply Security offers independent news and views as well as expert insight from Trend’s security experts. The site covers topics ranging from cloud security, data protection, security and privacy.

#47 Veracode Blog
Veracode Security Blog: Application security research, security trends and opinions. Everything you want to know about if you work in infosec or online.

#48 Unmask Parasites Blog
Unmask Parasites focuses on reviewing the latest security threats, zero days, and exploits. There is everything from security-related news, to information on keeping your site secure and malware-free.

#49 We Live Security
We Live Security is a site about research and information, not products. We Live Security’s writers represent the cream of ESET’s researchers and writers. They deliver in-depth research and analysis on security.

#50 Xylibox Security Blog
Tracking and demystifying cybercrime is what happens here. The author never fails to
produce consistent, detailed breakdowns of the latest malware and security tools.

#51 BankInfoSecurity
BankInfoSecurity is a multi-media website published by Information Security Media Group, Corp. (ISMG), a company specializing in coverage of information security, risk management, privacy and fraud.

#52 Cyveillance Blog
From sophisticated DDoS botnet attacks to phishing, the Cyveillance blog will keep you up-to-date with breaking cyber security news and information on everything related to web threats, malware and security. #53 Forbe’s Firewall
Forbe’s Firewall covers cyber security news and information on the latest exploits and trends affecting the industry. The articles are on point and informative, with the quality you can expect from Forbes.

#54 GovInfoSecurity
GovInfoSecurity is a multi-media website published by Information Security Media Group, Corp. (ISMG), a company specializing in coverage of information security, risk management, privacy and fraud.

#55 Graham Cluley’s Security Blog
Graham Cluley is an award winning cyber security blogger and independent computer security analyst. His blog reflects his knowledge and experience in the industry.

#56 GRC’s Security Now Podcast
Security Now is a weekly podcast hosted by Steve Gibson and Leo Laporte. The show is sponsored by Gibson Research Corporation, a company specializing in data recovery and security.

#57 HotforSecurity
This blog covers the sizzling world of computer security. You’ll find plenty of steamy stories from the dynamic world of internet fraud, scams, and malware.

#58 Imperva Blog
From analyst reports to case studies, to blog posts and white papers, the Imperva blog keeps step with the latest malware and security threats. You’ll find information on DDoS, malware, and zero day threats.

#59 IT Knowledge Exchange – Security Bytes
Written by the staff of SearchSecurity.com and Information Security magazine, Security Bytes covers topics across the spectrum of security, privacy and compliance.

#60 ItProPortal.com
ITProPortal.com was one of the very first technology websites to launch in the UK back in
1999 and has grown to become one of the UK’s leading and most respected technology information resources.

#61 Lenny Zeltser On Information Security
This blog by Lenny Zeltser focuses on information security. Lenny is a business and tech leader with extensive hands-on experience in IT and information security.

#62 Network Security Blog with Martin McKeay
One man’s views on security, privacy – and anything else for that matter. Trends, information, news: you’ll find it all on the Network Security blog, and what’s more is it’s delivered with style.

#63 PandaLabs Cyber Security Blog
This blog covers everything you need to know about internet threats. The PandaLabs blog keeps you abreast of the latest developments in cyber security.

#64 PaulDotCom
PaulDotCom Security weekly’s mission is to provide free content within the subject matter of IT security news, vulnerabilities, hacking, and research.

#65 Privacy & Information Security Law Blog
The views of one man on security, privacy and anything else that catches his attention. Security expert Martin McKeay talks about malware, privacy and security on this blog.

#66 Rational Survivability
Hoff’s ramblings about information survivability, information centricity, risk management and disruptive innovation. Hoff was a CISSP, CISA, CISM and NSA IAM, he now spends the AMF money on coffee.

#67 Risky Business
Risky.biz is another security podcast that focuses on covering recent developments in cyber security and the threat landscape. The show has been around since 2007, and takes a light approach to security news.

#68 Root Labs RDIST
Their research provides cutting-edge insight into solving tough security problems. There are countless articles on the latest cyber security trends and threats.

#69 Seculert Blog
The Seculert blog is a security blog with a focus on Advanced Persistent Threats and malware. There is no shortage of network security tips and insider information on the latest zero days.

#70 Security Street by Rapid7
Rapid7 provides vulnerability management, compliance and penetration testing solutions for web applications, network and database security. Their community, Security Street covers all of these issues.
#71 Securosis Blog
Securosis is the world’s leading independent security research and advisory firm, offering unparalleled insight and unique value to meet the challenges of managing security and compliance in a Web 2.0 world.

#72 SilverSky Altitude Blog
SilverSky is a cloud security services provider with a lot of knowledge in the industry. Their blog, the Altitude blog, is updated regularly with news and information every security professional should be aware of.

#73 SpiberLabs Security Blog
SpiderLabs is an elite team of ethical hackers, investigators and researchers at Trustwave advancing the security capabilities of leading businesses and organizations throughout the world. The site covers the latest security news.

#74 Social-Engineering.org
Social-Engineering.org is a cyber security blog that covers a wide range of security related topics. The site is also home to a podcast and a team of security professionals who share their expertise on all things security.

#75 The Security Skeptic
The Security Skeptic blogs about all matters related to Internet Security, from domain names (DNS), firewalls and network security to phishing, malware and social engineering.

#76 Thought Crime Cyber Security Blog
Moxie Marlinspike’s blog covers computer security and software development, particularly in the areas of secure protocols, cryptography, privacy, and anonymity.

#77 Troy Hunt’s Blog
Software architect and Microsoft MVP, you’ll find Troy Hunt writing about security concepts and process improvement in software delivery. The quality of content found here makes this blog worth visiting.

#78 1 Raindrop
Gunnar Peterson weaves his thoughts on distributed systems, security, and software together on his blog 1 Raindrop. The blog is both informative and insightful, and the coverage is on point.

#79 Andrew Hay’s Cyber Security Blog
Andrew Hay is the Director of Applied Security Research and Chief Evangelist at CloudPassage, Inc. This is his personal blog where he talks about security and other news.

#80 Carnal Ownage
Carnal Ownage is a must stop for security researchers and hackers alike. This cyber security blog goes into excruciating detail on attack methodology and highlights the threats your organization should be aware of.

#81 Command Line Kung Fu
This blog covers fun, useful, interesting, security related (and non-security related) tips and tricks associated with the command line. Find tips on OS X, Linux and Windows.

#82 Dancho Danchev’s Blog
This blog covers trends and fads, tactics and strategies, intersecting with third-party research, speculations and real-time CYBERINT assessments, all packed with sarcastic attitude.

#83 Darknet
Don’t Learn to HACK – Hack to LEARN. That`s the motto at Darknet. The site covers ethical hacking, penetration testing, and computer security. Learn about interesting infosec related news, tools and more.

#84 Errata Security
Errata Security is a team of dedicated security researchers that practice offensive security. The insight gained from research is delivered on the blog, which covers a variety of topics and real world scenarios.

#85 Exotic Liability
Chris Nickerson and Ryan Jones take it up a notch in their cyber security podcast. They routinely thumb their nose at the typical industry rhetoric and offer insight and commentary you won’t hear anywhere else.

#86 Hack Surfer
HackSurfer was formed by a group of businessmen and women, engineers, mathematicians, linguists and information analysts with a passion for making simple, powerful use of big data.

#87 InfoSec Institute Resources
The InfoSec Institute resources section has a broad selection of content and research on cyber security, threats, and of course, infosec. You’ll also find tutorials, training videos and more.

#88 J4vv4D Security Blog
